

What is it?

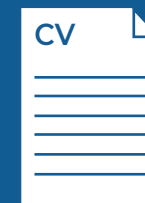

The objective of the Coimbra International Engineering Forum is to gather engineering students from all over the world in the University of Coimbra in order to solve a humanitarian worldwide problem using science and technology. There are 30 vacancies available and the participants will be divided into groups of 5, thus working with students of other nationalities, backgrounds and fields of study.

Application Process

Each invited university may send the application of one student of their choice, as its representative.

This application must be accompanied by the Curriculum Vitae of the candidate, as well as the applicant's letter of presentation / recommendation.

This should be sent to the e-mail:
coimbra@best.eu.org by July 22.

Selection Process

After all the applications received, the CIEF Organization will evaluate the 30 best candidates based on their presentation/ recommendation letter and their Curriculum Vitae.

The selected participants will be informed by July 27. The CIEF Organization will also establish a **10 participant Waiting List** that we will contact after we get any withdrawal from any participant.

Important Information

The University of Coimbra is in charge of all accommodation, food and transport expenses within Portugal, and the University of origin is responsible for the travel costs of its participant.
